2015 Request for Proposals for TPPA Grants

TPPA with the help of Maine Department of Environmental Protection and New Hampshire Department of Environmental Services conducted a Milton Three Ponds Watershed Survey beginning in 2009 and completed in 2011.

158 erosion sites were identified during the survey. The final report from these surveys was used to obtain federal grant money for a pilot project creating rain gardens, infiltration steps, and a retention basin at the town beach. Please check them out.

TPPA is continuing to provide grants of up to \$250 to property owners for remediation of erosion sites affecting the Milton Three Pond watershed. We hope to make these grants available yearly. These grants may be used for materials, labor, or design.

Use the application form on the second page of this document to submit a proposal for your project. To be considered for an award this year, application forms may be mailed to TPPA PO Box 1242, Milton, NH anytime during the year.

Award recipients will be expected to complete the project during 2015, and to submit receipts for costs of labor and materials, and photographs (showing before and after) for payment.

Grant amounts will be up to \$250 but shall not exceed 50% of project costs.

If you have already completed a project, you may still apply for reimbursement on a retroactive basis.

If you have any questions about the program or design of projects, please consult “A Shoreland Homeowner’s Guide to Stormwater Management”, which you can download from www.threeponds.org or call Wayne Sylvester, (603-653-6493, wsly7.sylvester@aol.com).

**Application for TPPA Grant for a Soil Erosion Remediation Project
to be completed in 2015**

Grant amounts will be up to \$250 but shall not exceed 50% of project costs.
